

CONFIDENTIAL

**UNIVERSITI TEKNOLOGI MALAYSIA
ALTERNATIVE ASSESSMENT SEMESTER II, SESSION 2025/2026**

SUBJECT CODE : SECV3263
SUBJECT NAME : MULTIMEDIA WEB PROGRAMMING
SECTION : 01
TIME : 3 DAYS
DATE/DAY : 13 – 15 JULY 2026
VENUES : ONLINE

INSTRUCTIONS:

- This alternative assessment consists of 1 question.
- Interim submission will be on the 14 July 2026 with at least 50% of work in-progress. The full submission is on the 15 July 2026.
- Candidate must complete and submit the **exam integrity declaration form** that is provided in the e-learning.

This question paper consists of FIVE(5) printed pages including this page.

QUESTION

You are required to work in a group (3 to 4 members) to design and develop an Interactive 3D Portfolio Website using Three.js. The portfolio website should showcase the profiles, skills, projects, and achievements of all group members through an engaging and interactive multimedia web experience.

Requirements:

Your portfolio website must include the following sections:

A. Landing Page

1. Group name and portfolio title.
2. Professional title or tagline.
3. Brief introduction of the group.
4. An interactive 3D scene that serves as the main visual attraction.

B. About Us Section

1. Profile of each group member.
2. Educational background.
3. Career interests and aspirations.
4. Personal achievements or certifications.

C. Skills Showcase

1. At least five (5) technical or professional skills for each group member.
2. Visual presentation of skills using interactive or animated 3D elements.

D. Project Gallery

1. At least three (3) projects for each group member.
2. Each project must include:
 - Project title
 - Brief description
 - Technologies used
 - Relevant images, videos, or demonstrations
3. Projects should be presented through an interactive gallery or 3D showcase.

E. Contact Section

1. Contact information.
2. Social media or professional networking links.
3. A functional contact form.

Technical Requirements:

The website must demonstrate the use of Three.js by implementing at least:

1. Five (5) 3D objects.
2. Two (2) different animations.
3. Two (2) lighting techniques.
4. One (1) textured 3D object.
5. User interaction through mouse, keyboard, or touch events.
6. Camera movement or navigation.

Deliverables:

1. Complete Source Code
2. Hosted website accessible through a public URL
3. Five (5)-minute demonstration video
4. Technical report (group submission)
5. Individual self-reflection report

Criteria	Marks
Technical Implementation	8
User Interaction and Animation	5
Multimedia Integration	4
UI/UX Design and Usability	5
Creativity and Innovation	5
Deployment	2
Individual Self-Reflection	1
Total	30

Alternative Assessment Rubric (30 Marks)

Criteria	Weight	Excellent (4)	Good (3)	Satisfactory (2)	Limited (1)
A. Technical Implementation	8	Three.js features are fully implemented. Multiple 3D objects, textures, lighting, camera control and animations work flawlessly. Code is well-structured and efficient.	Most required Three.js features are implemented correctly with only minor issues.	Basic Three.js implementation with several missing or incomplete features.	Minimal implementation. Major functionality missing or not working.
B. User Interaction & Animation	5	Highly interactive environment with smooth navigation, meaningful user interactions and engaging animations.	Interaction and animations function correctly with minor usability issues.	Limited interaction and basic animations.	Little or no meaningful interaction or animation.
C. Multimedia Integration	4	Excellent integration of images, videos, audio, graphics and multimedia content that enhances user experience.	Good use of multimedia elements with minor issues.	Basic multimedia content included but limited integration.	Very limited or inappropriate multimedia usage.
D. UI/UX Design & Usability	5	Professional design with excellent visual hierarchy, navigation, responsiveness and accessibility.	Clear and attractive design with minor usability issues.	Functional design but lacks consistency or responsiveness.	Poor design and difficult navigation.

E. Creativity & Innovation	5	Portfolio demonstrates exceptional originality, creativity and innovative use of Three.js concepts. Theme is consistently applied.	Good creativity with some original elements.	Some creative effort but mostly conventional design.	Minimal creativity or copied design concepts.
F. Deployment & Documentation	2	Website successfully deployed, all deliverables complete, documentation clear and professional.	Deployment successful with minor documentation issues.	Deployment or documentation partially complete.	Missing deployment or inadequate documentation.
G. Individual Self-Reflection	1	Reflection clearly explains the student's individual contribution, learning experience, challenges faced, solutions applied, and future improvements.	Reflection covers individual contribution and learning experience with minor lack of detail.	Reflection is brief and only partially explains the student's contribution or learning.	Reflection is missing, unclear, or does not show individual learning.
